

INSTRUCTIONS for the DISPOSAL of your WASTE

SEPARATE YOUR WASTE MATERIALS AND ACT AS STATED AT THE SIGNS:

Paper/cardboard:

To be put in the blue containers. **Cut large boxes in pieces** (this could be done at home) **and fold others** together in order to reduce volume before depositing in the containers.

Plastic bottles, house hold plastics and tins:

To be put in the yellow container. **Please flatten plastic bottles** (especially the big water containers) **and tin cans** to reduce their volume and increase the capacity of the container.

Glass:

To be put in the green glass-container. Please take care that glass does not fall outside this container. **Do not place any boxes or bags with your empty bottles anywhere else** for other people to have to clear it away for you.

General waste:

The green container bins are **not to be used to dispose of building materials, nor green** waste from your garden. All general household garbage should be put in closed bags and then **in the containers**.

Green waste:

Garden waste should only be put in **closed plastic green bags** and be placed at the designated area below the sign next to the container bins. To help you we have also made a special arrangement, available to all residents, to collect your garden waste, see the information at the display notices..

Furniture and large recyclables:

It is allowed to put your old furniture etc. in front of the separate building that is close to the basura area, provided that you use this area as per the instructions shown on the signs. It is **strictly forbidden to put any other waste such as building materials** at this site or anywhere else on the urbanization.

PLEASE HELP US TO KEEP OUR URBANISATION AS CLEAN AND TIDY AS IT SHOULD BE INCLUDING DURING THE HOLIDAY SEASONS.

THANK YOU.
